Public and professional visions of nuclear power in Poland

Abstract:

I will discuss the main issues related to the public reception of the Polish Nuclear Energy Program in Poland. An emphasis will be put onto the ways of presenting the nuclear power advantages and problems by experts and the expectations of the public in getting the appropriate (in their meaning) feedback from experts. In other words, I will try to evaluate if the visions of nuclear power by experts and public meet together. Finally, I will brainstorm on how to better communicate nuclear power matter to the society in Poland.

Serdecznie zapraszamy,
M. Dąbrowski, T. Kwiatkowski
